

Rhinoplasty Forceps
by Prof. Claudio Guastella

The new instrument for lateral osteotomy

RHINOPLASTY FORCEPS

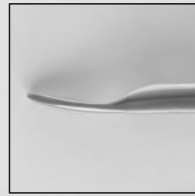

The lateral Osteotomy is a technique developed and patented by Prof. Guastella. The surgery requires the new designed Nasal Rhinoplasmy Forceps. It is the ideal instrument for an accurate cut in osteotomies only with a single hand movement.

- Precise and safe cut
- Easy and fast execution
- Mild edema and ecchymosis
- Optimal for double osteotomies
- Minimal soft tissue trauma
- Always complete osteotomy (also in previous fractures)
